ITEM	DESCRIPCION	UNIDAD	METRADO TOTAL
1	**OBRAS PRELIMINARES GENERALES**		
1.1	**OBRAS PRELIMINARES**		
1.1.1	**CAMPAMENTOS**		
1.1.1.1	Limpieza y Roce de Monte	m²	500.00
1.1.1.2	Excavación Plataforma Material Suelto a Mano	m³	41.40
1.1.1.3	Construcción de Campamentos Moviles a Pie de Obra (9 usos)	m²	80.00
1.1.1.4	Construccion de Oficinas, Comedor, Cocina, Caseta de Guardiania	m²	60.00
1.1.1.5	Construccion de Almacen para Materiales de Construccion	m²	120.00
1.1.1.6	Construccion de Cerco Perimetrico	m²	325.00
1.1.2	**CONSTRUCCION DE CAMINOS DE ACCESO**		
1.1.2.1	Limpieza y Roce de Monte	m²	1,500.00
1.1.2.2	Tala de Arboles y Extracción de Raices	und	50.00
1.1.2.3	Construcción de Trocha Carrozable	km	3.00
1.1.3	**MEJORAMIENTO DE CAMINOS DE ACCESO**		
1.1.3.1	Limpieza y Roce de Monte	m²	1,500.00
1.1.3.2	Mejoramiento de Caminos de Acceso Existentes	km	1.00
1.1.4	**MANTENIMIENTO DE CAMINOS DE ACCESO EXISTENTES**		
1.1.4.1	Mantenimiento de Trocha Carrozable Existentes	km	5.00
1.1.4.2	Limpieza de Derrumbes en Caminos de Acceso con Equipo	km	5.00
1.1.5	**REPLANTEO Y CONTROL TOPOGRAFICO DURANTE LA OBRA**		
1.1.5.1	Trazo y Replanteo de Canales	m	68,149.00
1.1.5.2	Control Planimetrico y Altimétrico - Trabajos Topográficos	mes	24.00
1.1.6	**CARTEL DE OBRA**		
1.1.6.1	Cartel de Identificacion de la Obra de 3.6 m x 2.4 m	und	1.00
1.2	**OBRAS PROVISIONALES**		
1.2.1	**INSTALACIONES PROVISIONALES**		
1.2.1.1	Instalacion de Agua Potable de la Red Existente	Glb	1.00
1.2.1.2	Instalacion de Energia Electrica Trifasico a Red Existente	Glb	1.00
1.2.2	**CONSTRUCCION DE CAMINO DE ACCESO PEATONAL Y/O CARRETILLA**		
1.2.2.1	Limpieza y Roce de Monte	m²	3,000.00
1.2.2.2	Construcción Manual de Caminos de Acceso para Carretilla	m	2,000.00

METRADO - OBRAS PRELIMINARES GENERALES

1.2.3	**TRANSPORTE DE MATERIALES Y EQUIPO**		
1.2.3.1	Transporte de Cemento con Volquete 5 m³ (D= 10 a 15 Km) - Carguio a Mano	bls	24,845.00
1.2.3.2	Transp. de Madera con Volquete 5 m³ (D = 10 a 15 Km) - Carguío a Mano	p²	64,600.00
1.2.3.3	Transp. de Fierro con Volquete 5 m³ (D = 10 a 15 Km) - Carguío a Mano	kg	28,905.00
1.2.3.4	Transp. de Tuberia de Ø 355 mm con Volquete 5 m³ (D = 10 a 15 Km) - Carguío a Mano	m	1,000.00
1.2.3.5	Transp. de Tuberia de Ø 315 mm con Volquete 5 m³ (D = 10 a 15 Km) - Carguío a Mano	m	9,260.00
1.2.3.6	Transp. de Tuberia de Ø 160 mm con Volquete 5 m³ (D = 10 a 15 Km) - Carguío a Mano	m	2,540.00
1.2.3.7	Transp. de Tuberia de Ø 63 mm a 160 mm con Volquete 5 m³ (D = 10 a 15 Km) - Carguío a Mano	m	55,349.00
1.2.3.8	Transporte de Agregados y Piedra con Volquete 5 m³ (D = 10 a 15 Km) - Carguío a Mano	m³	4,724.00
1.2.3.9	Transporte de Cemento con Bugui (Distancia de 0.75 a 1.00 Km)	bol	24,845.00
1.2.3.10	Transporte de Agregados con Bugui (Distancia de 0.75 a 1.00 Km)	m³	3,083.00
1.2.3.11	Transporte de Piedra con Bugui (Distancia Hasta 0.30 Km)	m³	1,641.00
1.2.3.12	Transporte de Agua con Bugui (Distancia de 0.75 a 1.00 Km)	m³	50.00
1.2.3.13	Transporte de Tierra con Bugui (Distancia de 0.30 a 0.50 Km)	m³	30.00
1.2.3.14	Transporte de Madera a Mano (Distancia de 0.75 a 1.00 Km)	p²	64,600.00
1.2.3.15	Transporte de Fierro a Mano (Distancia de 0.75 a 1.00 Km)	kg	28,905.00
1.2.3.16	Transporte de Tubería de Ø 355 mm a Mano (Distancia de 0.75 a 1.00 Km)	m	1,000.00
1.2.3.17	Transporte de Tubería de Ø 315 mm a Mano (Distancia de 0.75 a 1.00 Km)	m	9,260.00
1.2.3.18	Transporte de Tubería de Ø 160 mm a Mano (Distancia de 0.75 a 1.00 Km)	m	2,540.00
1.2.3.19	Transporte de Tubería de Ø 63mm a 160mm mm a Mano (Distancia de 0.75 a 1.00 Km)	m	55,349.00
1.2.3.20	Transporte de Materiales Menores, Herramientas y Equipo Menor a Pie de Obra a Mano	mes	1.00
1.2.3.21	Transporte de Materiales, Herramientas y Equipo Menor a Pie de Obra con Medio Camión	mes	1.00
1.2.4	**CARGA Y DESCARGA DE AGREGADOS Y MATERIALES**		
1.2.4.1	Carga y Descarga de Cemento a Mano	bol	24,845.00
1.2.4.2	Carga y Descarga de Madera a Mano	p²	64,600.00
1.2.4.3	Carga y Descarga de Fierro a Mano	kg	28,905.00
1.2.4.4	Carga y Descarga de Tuberia a Mano	m	68,149.00
1.2.4.5	Carguío de Agregados a Mano (a Bugui)	m³	3,083.00
1.2.4.6	Carguío de Piedra a Mano (a Bugui)	m³	1,641.00
1.2.4.7	Carguío de Tierra a Mano (a Bugui)	m³	50.00
1.2.5	**PREPARACION DE AGREGADOS Y PIEDRA**		
1.2.5.1	Preparación de Material para Compactar (Material Selecto)	m³	50.00
1.2.5.2	Extracción y Preparación de Piedra en Cantera a Mano	m³	50.00
1.2.5.3	Lavado de Piedra a Mano	m³	15.00
1.2.6	**CONTROL DE CALIDAD**		
1.2.6.1	Control de Calidad de Concreto Cada 50 m³	Ens	50.00

ANEXO ACTAS DE LIBRE DISPONIBILIDAD DE TERRENO Y PADRON DE USUARIOS

Acta de Compromiso Colectivo Alto Unión

ACTA DE COMPROMISOS
EXPEDIENTE TECNICO DEL PROYECTO URUSAYHUA.

A los ...Catorce..... días del mes de .....Octubre..... del 2018, siendo ...Catorce (14.00)..... horas, en el local de .....Comunal Alto Unión....., comprensión del Centro Poblado de .....PALMA REAL....., del Distrito de Echarate, Provincia de la Convención, Región Cusco, nos reunimos los directivos y beneficiarios del proyecto Irrigación Urusayhua, sector .....ALTO UNION....., con la participación de ..... Usuarios y los integrantes del equipo técnico del PLAN MERISS INKA, con el objetivo de tomar acuerdos relacionados a la Elaboración del Expediente Técnico del Proyecto "Irrigación Urusayhua". Esta reunión se realiza bajo la convocatoria del Presidente del Comité de Riego, ciudadano .....Roly Orue Escobar..... y su junta directiva.

La reunión citada se dio por iniciado con palabras de bienvenida por parte del presidente de la junta directiva, luego, tomaron la palabra los representantes del equipo profesional del PER PLAN MERISS INKA, quienes previo un cordial saludo explicaron de manera detallada las agendas consideradas y la necesidad de suscribir compromisos legales con los integrantes del sector beneficiario según la agenda propuesto:

1. **APROBACIÓN DEL COMPROMISO PARA LA OPERACIÓN Y MANTENIMIENTO DEL SISTEMA DE RIEGO.**

Los representantes del equipo de estudios del PER PLAN MERISS explicaron la necesidad de suscribir compromisos legales con los integrantes del sector beneficiario relacionados a la Operación y Mantenimiento del Sistema de Riego. Después de un amplio debate con los beneficiarios, se llegó a los siguientes acuerdos:

a. Los beneficiarios del proyecto, del sector .....Alto Unión....., nos comprometemos a asumir las acciones de operación y mantenimiento de la infraestructura de riego, en cumplimiento a las normas establecidas en el Sistema Invierte Pe y de acuerdo a las políticas del ministerio de agricultura.

b. Los beneficiarios del proyecto somos conocedores que la OPERACIÓN de la infraestructura implica realizar las acciones necesarias para el adecuado funcionamiento del sistema de riego.

c. Los beneficiarios del proyecto somos conocedores que el MANTENIMIENTO de la infraestructura son todas las acciones que permitan mantener en óptimas condiciones la infraestructura de riego.

d. Los beneficiarios del proyecto, del sector.....Alto Unión....., somos conocedores que la Ley de Recursos Hídricos, Ley N° 29338, contempla el pago de una tarifa de agua, la cual será fijada por los usuarios de riego y la autoridad local de aguas (ALA LC), cuyos recursos serán destinados a la gestión de la Operación y Mantenimiento de la Infraestructura de Riego y otras obligaciones.

2. **APROBACIÓN DEL COMPROMISO PARA LA ADQUISICIÓN DE EQUIPOS MÓVILES DE RIEGO (ASPERSORES, MANGUERAS Y ACCESORIOS) SEGÚN LAS ESPECIFICACIONES TÉCNICAS.**

Los representantes del PER PLAN MERISS explicaron a los asistentes lo relacionado a la ADQUISICIÓN DE EQUIPOS MOVILES DE RIEGO. Después de un amplio diálogo y consenso con los beneficiarios, se llegó a los siguientes acuerdos:

a. Los beneficiarios del proyecto de Irrigación Urusayhua del sector.....Alto Unión....., nos comprometemos a asumir los costos de la Adquisición de los Equipos Móviles de Riego (mangueras, aspersores y accesorios) para la implementación del riego a nivel de parcela, en cumplimiento a las normas del Sistema Invierte Pe, la cual establece que el Estado solo financia la construcción de obras de beneficio colectivo.

b. Los beneficiarios del proyecto, del sector .....Alto Unión....., somos conocedores que el cumplimiento de este requisito es una condición para la aprobación de los estudios de pre inversión del presente proyecto.

3. COMPROMISO DE APORTE COMUNAL DURANTE LA ETAPA DE EJECUCION DE LA OBRA.

Prosiguiendo con la asamblea con los beneficiarios del sector..Alto Unión....., los representantes del equipo profesional del PER PLAN MERISS INKA, recalcaron e hicieron conocer los alcances y beneficios del proyecto a los asistentes, y la necesidad de suscribir el compromiso legal con los usuarios del sector beneficiario relacionado al **APORTE COMUNAL** durante la etapa de ejecución de obra del proyecto Irrigación Urusayhua. Después de un amplio debate con los beneficiarios se consensuo y se llegó a los siguientes acuerdos:

a. Los beneficiarios del proyecto, del sector .....Alto Unión....., nos comprometemos a aportar una contrapartida denominada "aporte comunal", cuyo valor será definido cuando se cuente con el presupuesto del "Costo Directo de la obra física", en la etapa de expediente técnico.
b. Los beneficiarios del proyecto, somos conocedores que el "aporte comunal" es un requisito, establecido por el Sistema Invierte Pe, para la aprobación del Expediente Técnico del proyecto Irrigación Urusayhua.
c. El aporte comunal será cumplida, sin excepción, por cada uno de los usuarios del proyecto, de acuerdo al área a irrigar, establecida en el padrón de usuarios, bajo la modalidad de faenas, materiales o cualquier otra forma de trato o gestión que pueda ser valorizado durante la etapa de ejecución del proyecto.
d. Los beneficiarios del proyecto, del sector .....Alto Unión....., somos conocedores que, el cumplimiento con el aporte comunal permitirá la adquisición de derechos relacionado al uso de agua para riego.

Estando en pleno conocimiento, los beneficiarios del proyecto Irrigación Urusayhua, del sector .....Alto Unión....., ratificamos el contenido del presente Acta, la cual suscribimos en señal de conformidad, concluyendo con la asamblea, siendo las .....15:50....., horas, del mismo día.

ACTA COLECTIVA

ACTA DE COMPROMISO, PARA EL ACUERDO DE LIBRE DISPONIBILIDAD DE TERRENO PARA FINES DE EJECUCIÓN DE OBRA DEL PROYECTO DE IRRIGACION "URUSAYHUA"

En los sectores de ..... ALTO UNIÓN ..... a los ..... 14 .....días del mes de ..... OCTUBRE ..... del año 2018, siendo las horas. 14:00 los que al final suscribimos en nuestra condición de beneficiarios de los sectores..... Alto Unión .....comprensión del distrito de ..... Ccatcato .....Provincia de..... La Convención Región Cusco, a iniciativa de la organización de regantes y bajo la convocatoria de la junta directiva, nos reunimos conjuntamente con representantes del proyecto de irrigación Urusayhua del PER PLAN MERISS para tratar la agenda siguiente:

Aprobación de la libre disponibilidad de terrenos para la ejecución física de la obra, para lo cual los representantes del PER PLAN MERISS explicaron a los presentes, las actividades a desarrollarse en la etapa de ejecución de la obra, que implica, la apertura de zanjas para el canal principal y laterales, construcción de obras de arte, así como la habilitación de caminos de accesos, donde necesariamente algunas parcelas pueden ser afectadas, luego de un debate participativo se llegó a los siguientes acuerdos:

Los propietarios de los Sectores ..... Alto Unión .....nos comprometemos a dar libre disponibilidad de terrenos agrícolas y no agrícolas para fines de la ejecución física de la obra.

Los beneficiarios del Proyecto en conjunto a través de nuestra organización nos hacemos responsables de hacer acciones de reposición y/o reparación de daños a los propietarios de las parcelas afectadas.

Estando en conocimiento los beneficiarios del proyecto de irrigación Urusayhua del sector ..... Alto Unión .....ratificamos los acuerdos establecidos y en señal de conformidad firmamos aquí los presentes, siendo las horas ..... 15:50 ..... del mismo día:

OTROS ANEXOS

RESOLUCIÓN DIRECTORAL Nro. 322 -2015-ANA/AAA XII.UV.

Cusco, 11 NOV 2015

VISTO:

El Expediente con registro N° 504-2015 y con CUT N°75513-2015 tramitado ante la Administración Local de Agua La Convención, deriva de la Solicitud de fecha de recepción 11-06-2015, presentado por el Proyecto Especial Regional Plan Meriss, representado por Oscar Gálvez Delgado, en calidad de Jefe de la Unidad de Gestión Ceja de Selva, peticionando la Acreditación de Disponibilidad Hídrica Superficial con Fines Agrarios, para el Proyecto **"Instalación del Servicio de Agua para Riego Tecnificado en los sectores de Urusayhua, Ichiquito-Palma Real, Distrito de Echarati, Provincia La Convención, Región Cusco"**, provenientes de los ríos Pitupaccha, Ichiquiato, Talancatoniyoc y quebradas Huaynapata y Pompeya.

CONSIDERANDO:

Que, la Acreditación de Disponibilidad Hídrica se encuentra prevista en el numeral 79.1[1] del Art. 79° y numeral 81.1[2] y 81.2[3], del artículo 81° del Reglamento de la Ley de Recursos Hídricos Decreto Supremo N°001-2010-AG., modificado por Decreto Supremo N°023-2014-MINAGRI;

Que, el procedimiento se instruyó bajo la vigencia de la Resolución Jefatural N°007-2015-ANA Reglamento de Procedimientos Administrativos para el Otorgamiento de Derechos de Uso de Agua y para tal fin presenta documentos de fojas (01-628), los que se encuentran ***adecuados*** al Reglamento de la Ley N°29338 Ley de Recursos Hídricos;

Que, se efectuó la primera verificación técnica de campo, en fecha 06-08-2015, hora de inicio 08:12 a.m. (fojas 576 y 577), con participación del administrado y personal de la ALA La Convención, en la que se constató la fuente hídrica denominado río Pitupaccha, se ubica en las coordenadas UTM WGS 84 18S, 743000 E, 8593000 N, altitud 1554 msnm, con un aforo de 1,705.00 l/s; segunda verificación técnica de campo, en fecha 06-08-2015, hora de inicio 15:25 p.m. (fojas 578 y 579), con participación del administrado y personal de la ALA La Convención, en la que se constató la fuente hídrica denominado río Talancatoniyoc, se ubica en las coordenadas UTM WGS 84 18S, 752854 E, 8594616 N, altitud 1830 msnm, con un aforo de 236.00 l/s; tercera verificación técnica de campo, en fecha 06-08-2015, hora de inicio 13:20 p.m. (fojas 580 y 581), con participación del administrado y personal de la ALA La Convención, en la que se constató la fuente hídrica denominado río Ichiquiato, se ubica en las coordenadas UTM WGS 84 18S, 745687 E, 8599955 N, altitud 1095 msnm, con un aforo de 683.00 l/s; cuarta verificación técnica de campo, en fecha 06-08-2015, hora de inicio 10:51 a.m. (fojas 582 y 583), con participación del administrado y personal de la ALA La Convención, en la que se constató la fuente hídrica denominado Quebrada Pompeya, se ubica en las coordenadas UTM WGS 84 18S, 744827 E, 8597699 N, altitud 1773 msnm, con un aforo de 37.20 l/s; quinta verificación técnica de campo, en fecha 06-08-2015, hora de inicio 09:10 a.m. (fojas 584 y 585), con participación del administrado y personal de la ALA La Convención, en la que se constató la fuente hídrica denominado Quebrada Huaynapata, se ubica en las coordenadas UTM WGS 84 18S, 743672 E, 8595120 N, altitud 1799 msnm, con un aforo de 45.00 l/s;

Que, con Oficio N° 425-2015-ANA/ALA-LC/. (folio 236), el Administrado Local de Agua La Convención remite el expediente administrativo a la Autoridad Administrativa del Agua XII Urubamba Vilcanota para continuar el trámite. Asimismo con Informe Técnico N° 071-2015-ANA-AAA XII UV-SDARH/DPET-EARH, (fojas 608-622) la Especialista SDARH concluye que, el expediente administrativo con Reg. N° 504-2015, para Acreditación de disponibilidad hídrica del proyecto "Instalación del Servicio de Agua para Riego Tecnificado en los sectores de Urusayhua, Ichiquito-Palma

Abog. Elvis F. Sulca Arana
Sub Director
AUTORIDAD ADMINISTRATIVA DEL AGUA XII UV - ANA - SDUAJ

---

[1] Los procedimientos para el otorgamiento de la licencia de uso de agua son: a) Autorización de Ejecución de Estudios de Disponibilidad Hídrica, b) Acreditación de Disponibilidad Hídrica, c) Autorización de Ejecución de Obras de Aprovechamiento Hídrico.

[2] La Acreditación de la Disponibilidad Hídrica certifica la existencia de recursos hídricos en cantidad, oportunidad y calidad apropiadas para un determinado proyecto en un punto de interés, se puede obtener mediante a) Resolución de Aprobación de la Disponibilidad Hídrica y b) Opinión Técnica Favorable a la Disponibilidad Hídrica contenida en el Instrumento de Gestión Ambiental (IGA)

[3] La Acreditación de Disponibilidad Hídrica tiene un plazo de vigencia de dos (02) años, no faculta a usar el agua ni ejecutar obras y no es exclusiva ni excluyente. Puede ser otorgado a más de un peticionario, respecto de una misma fuente

Real, Distrito de Echarati, Provincia La Convención, Región Cusco", proviene de los ríos Pitupaccha, Ichiquiato, Talancatoniyoc y quebradas Huaynapata y Pompeya, siendo favorable con un volumen de **23'928,698.15 m3/año** de acuerdo *a la demanda hídrica del proyecto, lo que garantiza la cantidad y oportunidad de aprovechamiento* y la no afectación a derechos de terceros; además recomienda otorgar por un plazo máximo de vigencia de dos (02) años la Resolución Administrativa de Acreditación de disponibilidad hídrica como procedimiento administrativo previo para el Otorgamiento de la Licencia de Uso de Agua. Estando de acuerdo con lo expresado el Sub Director de Administración de Recursos Hídricos dio la conformidad con el Informe Técnico N° 271-2015-ANA-AAA-UV/SDARH/SDM (folio 623);

Que, de la evaluación de los actuados en el expediente de Acreditación de *Disponibilidad Hídrica, para la obtención de Licencia de Uso de Agua con Fines Agrarios de las fuentes hídricas: ríos* Pitupaccha, Ichiquiato, Talancatoniyoc y quebradas Huaynapata y Pompeya, para el Proyecto "Instalación del Servicio de Agua para Riego Tecnificado en los sectores de Urusayhua, Ichiquito-Palma Real, Distrito de Echarati, Provincia La Convención, Región Cusco", se evidencia que el administrado ha cumplido con presentar los requisitos previstos por la norma y atendiendo lo manifestado en los informes técnicos, se colige que el procedimiento administrativo se ha llevado de manera regular, sin mediar vicio que lo invalide, cumpliendo con los parámetros técnicos y requisitos legales, por lo que, resulta amparable;

Que, con los vistos de la *Unidad de Asesoría Jurídica Informe Legal N° 127-2015-ANA/AAA XII-UV-UAJ-mbc* y de la Sub Dirección de Administración de Recursos Hídricos Informe Técnico N° 271-2015-ANA-AAA-UV/SDARH/SDM y de conformidad con lo establecido por el D.S. N° 06-2010-AG, Reglamento de Organización y Funciones de la Autoridad Nacional del Agua; esta Autoridad Administrativa del Agua XII-Urubamba – Vilcanota;

RESUELVE:

Abog. Elvis F. Sulica Arena Sub Director

ARTÍCULO 1°.- APROBAR, la Acreditación de Disponibilidad Hídrica de Agua Superficial, con Fines Agrarios para el proyecto denominado "Instalación del Servicio de Agua para Riego Tecnificado en los sectores de Urusayhua, Ichiquiato-Palma Real, Distrito de Echarati, Provincia La Convención, Región Cusco", a favor del Proyecto Especial Regional Plan Meriss, de acuerdo al siguiente detalle:

UBICACIÓN POLÍTICA	TIPO DE FUENTE	NOMBRE DE LA FUENTE DE AGUA	POSIBLES PUNTOS DE CAPTACION - COORDENADAS GEOGRÁFICAS (UTM Datum WGS-84-Z18S)			CAUDAL ACREDITADO (l/s)	VOLUMEN ANUAL ACREDITADO

CARACTERIZTICAS HIDRAULICAS DEL RIO

1. CONDICIONES DE DISEÑO
   - 1.1 Caudal Maximo = 19.194 m3/seg. (105 Años.)
   - 1.2 Caudal promedio = 4.060 m3/seg.
   - 1.3 Caudal Minimo = 0.212 m3/seg.
   - 1.4 Pendiente Promedio = 6.70 %
   - 1.5 Caudal de diseño = 0.108 m3/seg.
   - 1.6 Ancho de garganta Bocatoma = 12.00 m.
2. ACEROS
   - 2.1 Acero Estructural Ø = ⅜" , ½" @ 0,25m. en ambos sentidos : Losas de Operaciones y Cortinas de Protección.
3. RECUBRIMIENTOS
   - 3.1 En contacto con el Agua y Suelo: r: 0,075m.
   - 3.2 En contacto con el Medio Ambiente: r: 0,040m.

C6=	msnm	1824.873

ESPECIFICACIONES TÉCNICAS

1 CONCRETOS
1.1.-C° fc = 175kg/cm². : Nave Sedimentadores, Canal de Purga
1.2.-C° A° fc= 210kg/cm². : Losa y Cortinas de Protección

2 ACEROS
2.1.- Fierro corrugado : Ø = 3/8" @ 0.15m en ambos sentidos
2.2.- Esfuerzo de fluencia : fy = 4200 kg/cm².

3 ACABADOS
3.1.- Tarrajeo con mortero cemento/arena 1:3

4 TIPO DE SUELO
4.1.- $q_{Admisible\ Mínimo}$: 1.00 kg/cm² (Verificar en campo)

UNIONES SOLDADAS EN ESTRUCTURA METÁLICA

NORMA:

ANSI/AISC 360-10: Specification for Structural Steel Buildings Chapter J. Design of Connections.

MATERIALES:

- Perfiles (Material base): A572 50ksi.
- Material de aportación (soldaduras): Electrodos de la serie E70XX. Para los materiales empleados y el procedimiento de soldadura SMAW (Arco eléctrico con electrodo revestido), se cumplen las condiciones de compatibilidad entre materiales exigidas por el artículo J.2.6.

DEFINICIONES PARA SOLDADURAS EN ÁNGULO:

- Garganta efectiva: es igual a la menor distancia medida desde la raiz a la cara plana teórica de la soldadura (J.2.2a).
- Lado del cordón: es el menor de los dos lados situados en las caras de fusión del mayor triángulo que puede ser inscrito en la sección de la soldadura (AWS D1.1/D1.1M:2002 Annex B).
- Raiz de la soldadura: es la intersección de las caras de fusión (AWS D1.1/D1.1M:2002 Annex B).
- Longitud efectiva del cordón de soldadura: es igual a la longitud total de la soldadura con dimensiones uniformes, incluidos los retornos (art. 2.3.2.1 of AWS D1.1/D1.1M:2002).

DISPOSICIONES CONSTRUCTIVAS:

1) Las prescripciones consideradas en este proyecto se aplican a uniones soldadas donde:

- Los aceros de las piezas a unir tienen un límite elástico no mayor que 100 ksi [690 MPa] (artículo 1.2 (1) AWS D1.1/D1.1M:2002).
- Los espesores de las piezas a unir son al menos de 1/8 in [3mm] (artículo 1.2 (2) AWS D1.1/D1.1M:2002).
- Las piezas soldadas no son de sección tubular.

2) En soldaduras a tope de penetración total o parcial se cumple que:

- La longitud efectiva de las soldaduras de penetración total o parcial es igual a la dimensión de las piezas unidas perpendicular a la dirección de las tensiones de tracción o compresión. (art. 2.3.1.1 of AWS D1.1/D1.1M:2002).
- En soldaduras de penetración total, la garganta efectiva es igual al menor espesor de las piezas unidas (art. 2.3.1.2 of AWS D1.1/D1.1M:2002).
- En soldaduras de penetración parcial, el espesor mínimo de la garganta efectiva cumple con los valores de la siguiente tabla:

Tabla J2.3 ANSI/AISC 360-10

Menor espesor de las piezas a unir (mm)	Espesor mínimo de garganta efectiva (mm)
Menor o igual que 6	3
Menor o igual que 13	5
Menor o igual que 19	6
Menor o igual que 38	8
Menor o igual que 57	10
Menor o igual que 150	13
Mayor que 150	16

- El espesor de garganta efectiva de las soldaduras de penetración parcial se determina según la tabla J2.3.

3) En soldaduras en ángulo se cumple que:

- El tamaño mínimo del lado de una soldadura en ángulo cumple con los valores de la siguiente tabla:

Tabla J2.4 ANSI/AISC 360-10

Menor espesor de las piezas a unir (mm)	Tamaño mínimo del lado de una soldadura en ángulo[a] (mm)
Menor o igual que 6	3
Menor o igual que 13	5
Menor o igual que 19	6
Mayor que 19	8

[a]Ejecutada en una sola pasada

- El tamaño máximo del lado de una soldadura en ángulo a lo largo de los bordes de piezas soldadas cumple con el artículo J2.2b, el cual exige que:
  - debe ser menor o igual que el espesor de la pieza si dicho espesor es menor que 6 mm,
  - debe ser menor o igual que el espesor de la pieza menos 2 mm si dicho espesor es mayor o igual que 6 mm
- La longitud efectiva de un cordón de soldadura en ángulo cumple que es mayor o igual que 4 veces el tamaño de su lado, o bien que el lado no se considera mayor que el 25 % de la longitud efectiva de la soldadura. Adicionalmente, la longitud efectiva de una soldadura en ángulo sujeta a cualquier solicitación de cálculo no es inferior a 40 mm (J2.2b).

4) En el detalle de las soldaduras se indica la longitud efectiva del cordón (longitud sobre la cual el cordón tiene su tamaño completo). Para alcanzar dicha longitud, puede ser necesario prolongar el cordón rodeando las esquinas, con el mismo tamaño de cordón.

5) Las soldaduras en ángulo de uniones en "T" con ángulos menores que 30° no se consideran como efectivas para la transmisión de las cargas aplicadas (artículo 2.3.3.4 AWS D1.1/D1.1M:2002).

6) En los procesos de fabricación y montaje se deberá cumplir con los requisitos indicados en el capítulo 5 de AWS D1.1/D1.1M:2002 y capítulo M de ANSI/AISC 360-10. En lo que respecta a la preparación del metal base, se exige que las superficies sobre las cuales se depositará el metal de aportación sean suaves, uniformes, y libres de desgarramientos, fisuras y otras discontinuidades que afectarían a la calidad o resistencia de la soldadura. Las superficies a soldar y las superficies adyacentes a una soldadura, deberán estar también libres de laminillas, escamas, óxido suelto o adherido, escoria, herrumbre, humedad, aceite, grasa y otros materiales extraños que impidan una soldadura apropiada o produzcan emisiones perjudiciales.

COMPROBACIONES:

- La resistencia de cálculo de los cordones de soldadura se determina conforme al artículo J.2.4 ANSI/AISC 360-10.
- El método utilizado para la comprobación de la resistencia de los cordones de soldadura es aquel en el que las tensiones calculadas en los cordones (resultante vectorial), se consideran como tensiones de corte aplicadas sobre el área efectiva (artículo J.2.4 ANSI/AISC 360-10).
- El área efectiva de un cordón de soldadura es igual al producto de la longitud efectiva del cordón por el espesor de garganta efectiva (artículo J2.2a ANSI/AISC 360-10).

CONTROLES DE CALIDAD CONCRETO

ACERO DE REFUERZO:

LAS VARILLAS DE ACERO UTILIZADAS EN LA CONSTRUCCION DE ESTRUCTURAS DE CONCRETO ARMADO, CUMPLIRAN LOS RESQUISITOS ESTABLECIDOS EN LOS TITULOS 7 Y 8 DE LA NORMA E-060 PARA CONCRETO ARMADO.
EL ACERO SERA DE CALIDAD, GRADO 60, CON UN ESFUERZO EN EL LIMITE DE FLUENCIA DE fy=4200 kg/cm2.
ALARGAMIENTO MINIMO EN 20 cm.= 12%
CORRUGACIONES DE ACUERDO A LA NORMA ASTM A-615

DEBERA OBSERVARSE QUE LAS VARILLAS A EMPLEAR PRESENTAN SU SUPERFICIE LIBRE DE CORROSION, GRIETAS, SOPLADURAS O CUALQUIER OTRO DEFECTO QUE PUDIERA AFECTAR DESFAVORABLEMENTE SUS CARACTERISTICAS MECANICAS.

COLOCACION DEL REFUERZO:

PREPARACION Y COLOCACION:
ANTES DEL EMPLEO DE LAS ARMADURAS SE LIMPIARAN CUIDADOSAMENTE PARA QUE SE ENCUENTREN LIBRES DE POLVO, BARRO, ACEITES, PINTURA Y TODA OTRA SUSTANCIA CAPAZ DE REDUCIR LA ADHERENCIA CON EL CONCRETO.
PARA SOSTENER O FIJAR LAS ARMADURAS EN LOS LUGARES CORRESPONDIENTES SE EMPLEARAN SOPORTES O ESPACIADORES METALICOS O DE MORTERO Y ATADURAS METALICAS, NO PODRAN EMPLEARSE TROZOS DE LADRILLO, MADERA, O CAÑAS, NI PARTICULAS DE AGREGADOS.

RECUBRIMIENTOS DEL ESFUERZO:

SE ENTIENDE POR RECUBRIMIENTOS A LA DISTANCIA LIBRE COMPRENDIDA ENTRE EL PUNTO MAS SALIENTE DE CUALQUIER REFUERZO Y LA SUPERFICIE EXTERNA DEL CONCRETO MAS PROXIMO, EXCLUYENDO TARRAJEOS Y TODO OTRO MATERIAL DE ACABADOS.

DIMENSIONES DE LOS RECUBRIMIENTOS:

ELEMENTO ESTRUCTURAL	RECUBRIMIENTO DEL REFUERZO
– ZAPATAS	10.00 cm.
– PLACAS	5.00 cm.
– VIGAS	5.00 cm.

LOS RECUBRIMIENTOS SE LOGRARAN MEDIANTE EL EMPLEO DE DADOS DE CONCRETO O MORTERO.

SEPARACION ENTRE VARILLAS:
LA SEPARACION MINIMA ENTRE VARILLAS RECTAS INDIVIDUALES Y PARALELAS DE LA ARMADURA, FUERA DE UNA ZONA DE EMPALME, EN GENERAL DEBERA SER COMO MINIMO 2.50 cm. Y NO MENOR QUE EL TAMANO MAXIMO DEL AGREGADO GRUESO.

EJECUCION Y CONTROLES DE CALIDAD PARA ESTRUCTURAS DE CONCRETO

CONCRETO ARMADO : EN ELEMENTOS ESTRUCTURALES (ESTRIBOS, PILAR Y ZAPATAS) DEBERA EMPLEARSE UN f'c=210 Kg/cm2

CONCRETO CICLOPEO: EN SOLADO, CIMENTACIONES Y SOBRECIMIENTOS DEBERA EMPLEARSE EL f'c DE ACUERDO A LO INDICADO EN LOS DETALLES DEL PLANO

MATERIALES:

CEMENTO:
CUMPLIRA CON LO ESPECIFICADO PARA CONCRETO ARMADO.

AGREGADOS: (EN CASO DE CONTAR CON AGREGADO GRUESO)
EL AGREGADO DENOMINADO "HORMIGON" CONSISTIRA EN UNA MEZCLA NATURAL DE ARENA Y PIEDRA.
LA PIEDRA DESPLAZADORA NO EXCEDERA DEL 30% DEL VOLUMEN TOTAL DEL CONCRETO CICLOPEO Y SERA COLOCADA DE MANERA HOMOGENEA, DEBIENDO QUEDAR TODOS SUS BORDES ENDEBIDOS EN EL CONCRETO LA MAYOR DIMENSION DE LA PIEDRA DESPLAZADORA NO EXCEDERA DE 25 cm.

L1: Long. De Transición
H: Altura de canal rectangular
L2: Long. Sección de control
L3: Long. De caida de Salto
L4: Long de poza
P: Profundidad de poza
e: Espesor de Loza
S1: Elevación del Pizo de Sección de control

UNIVERSIDAD NACIONAL DE SAN ANTONIO ABAD DEL CUSCO
FACULTAD DE INGENIERIA CIVIL

PROYECTO DE ESPECIALIDAD PARA OPTAR AL TITULO DE INGENIERO CIVIL

"INSTALACIÓN DE SERVICIO DE AGUA PARA RIEGO TECNIFICADO EN LOS SECTORES DE URUSAYHUA - ICHIQUIATO BAJO - PALMA REAL, DISTRITO DE ECHARATE - LA CONVENCIÓN - CUSCO" - BLOQUE DE RIEGO TALANCATONIYOC

PLANO:

SALTO HIDRAULICO TALANCATONIYOC

PRESENTA: BACH. ALEX KLEIBER TORRES QUISPE
CÓDIGO DE ALUMNO: 114104

COMISIÓN DICTAMINDORA DE TESÍS
Presidente: ING. CARLOS HUGO LOAYZA SCHIAFFINO
Integrantes: ING. RICARDO ALFONSO VALLENAS CASAVERDE
DR. ING. EDWIN ASTETE SAMANEZ

UBICACIÓN:
DPTO. : CUSCO
PROV. : LA CONVENCIÓN
DIST. : ECHARATE
C.P. : PALMA REAL
SECT. : ALTO UNIÓN

FECHA: ENERO - 2023

LAMINA: SAH-01

Nº PLANO: 01 de 01

ESCALA: INDICADAS
